

NG Bailey

Gabe Sousa

Graduate Civil Design Engineer

FREEDOM

Describe your role in three words:

Engaging, challenging and rewarding.

What are you enjoying most about your role?

I am thoroughly enjoying the process, particularly the personal development initiatives and the broad exposure to different areas of the business.

What have been the more challenging aspects?

At first, it was challenging to manage multiple workloads while simultaneously developing new technical skills but this is something I've learnt to manage through experience.

Who have you been working with in the business?

I have been working as part of the Civil Design team on a variety of different projects in the northern region for clients such as Northern Powergrid, Scottish Power Energy Networks and Scottish Power.

What key skills have you learnt?

The graduate scheme has helped me to enhance key skills, especially relating to presenting and communicating more effectively.

Has it been what you expected?

I'd say my expectations have been exceeded - there have been many opportunities I never imagined would be open to me.

What has been the highlight of your time with NG Bailey so far?

It has to be induction week, where I had the chance to participate in a teambuilding event with the rest of the new graduates, which saw me get involved with different independent and team building exercises. It was a lot of fun and really helped me to settle in.

What advice would you give to others considering joining our graduate scheme?

I would say, get involved. It's a great company that treats you well and there are many opportunities available for development. Make sure you get out of your comfort zone and try as many things as you can if you are successful.
