

NG Bailey

Henry Liu

Graduate Civil Design Engineer

FREEDOM

Describe your role in three words:

Enriching, analytical, collaborative.

What are you enjoying most about your role?

Collaborating with experienced engineers to integrate structural engineering with civil design has been a gratifying and enriching experience.

What have been the more challenging aspects?

Communicating enquiries and ideas with clarity and efficiency has been challenging when navigating new topic areas.

Who have you been working with in the business?

I have collaborated with civil and structural engineering teams to develop designs and solutions for numerous substation projects across the UK, working with various Distribution Network Operators.

What key skills have you learnt?

The ability to transform our client's ideas into tangible designs and effectively communicate them through detailed drawings.

Has it been what you expected?

My graduate role has offered an excellent environment for my professional growth, but the emphasis on personal development has been a pleasant surprise.

What has been the highlight of your time with NG Bailey so far?

Seeing my drawings and designs come to life has been the most rewarding aspect of my role.

What advice would you give to others considering joining our graduate scheme?

The graduate role will be the best opportunity for you to explore different business areas and gain knowledge of the industry, so be prepared to take on tasks and responsibilities outside your comfort zone.
