

NG Bailey

Mohammed Patel

Graduate Project Manager ENGINEERING

Describe your role in three words:

Agile, collaborative, strategic.

What are you enjoying most about your role?

The ability to see the direct impact of the work I get involved in.

What have been the more challenging aspects?

Honing the ability to manage time effectively ensuring output is prioritised in a strategic manner.

Who have you been working with in the business?

I have been working with the North West Engineering team on the Terminal 2 refurbishment (T2R) project at Manchester Airport.

What key skills have you learnt?

I have explored effective ways of communicating with clients, colleagues and subcontractors to ensure that we are working towards a shared goal.

Has it been what you expected?

The graduate scheme has pushed me further than I imagined, with focus on various aspects, for not only business goals but personal development goals too.

What has been the highlight of your time with NG Bailey so far?

I would say seeing the final finish of various design drawings that I have co-ordinated on the T2R project has been a true highlight. To know that I have played a part in the construction of a landmark project in Manchester is especially rewarding with me being from the area.

What advice would you give to others considering joining our graduate scheme?

I would always advise anybody to grasp every opportunity that comes your way as they can often open doors you wouldn't expect.
