Job Title	
Email Address	
Date	

Agreement to support the Social Values Commitments outlined in this form					
Signed		Name/ Job Title:		Date:	

Social Value measures the positive value businesses create for the economy, communities, the environment, and society. NG Bailey generate social value by engaging and working collaboratively with our supply chain, individuals, groups, and businesses from the communities we work in, to identify and deliver activities which best support their needs and initiatives and promote a sustainable change.

As a potential member of our supply chain, you will be expected to embrace NG Bailey’s commitment to Social Value, supporting not only NG Bailey activity but delivering your own contributions for the benefit of the local community.

Outlined below are the core social value KPI’s that form part of all our project delivery and as part of the procurement process, we require you to populate the table overleaf with your commitments for the delivery of social value for this project. Please note that once the contract is in progress there may be further enhanced social value requirements unique to the client which may require your support, but these will be discussed on a case-by-case basis.

Please complete and include this document within your sub-contract enquiry submission. If your submission is successful, your progress against these

KPI’s will discussed in monthly reviews.

Social Values Theme	Social Values Outcome	Requirement	Subcontractor Commitment [Please insert answer]
